THE RHODE ISLAND LOTTERY

September 30, 2011

The Honorable Lincoln D. Chafee, Governor
Rosemary Booth Gallogly, Director of Revenue

We are pleased to present to you the COMPREHENSIVE ANNUAL FINANCIAL REPORT of the Rhode Island Lottery (the Lottery) for the fiscal year ended June 30, 2011. This report has been prepared by the Finance Department of the Lottery. The Lottery is responsible for the accuracy of the financial data and the completeness and fairness of the presentation, including all disclosures.

The Lottery is a division of the Department of Revenue of the State of Rhode Island, and its financial statements are included in the State's Comprehensive Annual Financial Report. This report presents Lottery activity in a single enterprise fund. Only the activity of the Lottery, and no other data or information related to any other State agency or fund, is included in this report.

Generally Accepted Accounting Principles (GAAP) require that management provide a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of Management's Discussion and Analysis (MD&A). This letter of transmittal is designed to complement MD&A and should be read in conjunction with it. The Lottery's MD&A can be found immediately following the report of the independent auditors.

The Lottery was created by Constitutional Amendment passed on November 6, 1973. The legislation to create the Lottery was passed in March of 1974, and the Lottery began in May of 1974. The Lottery is operated like a business within the framework of State laws and regulations. Like any business, the Lottery's goal is to maximize income. As a State agency, however, the challenge lies in accomplishing this while maintaining the trust and best interest of the citizens of Rhode Island. It is our goal to achieve both.

THE LOT

1425 Pontiac Avenue Cranston, Rhode Island 02920 401-463-6500 www.rilot.com

History of the Lottery Industry

State run lotteries have long represented to governments an attractive alternative to other taxation methods, since their profits were returned to the public through community works, cultural activities, or financing of various projects. Two examples are the Vatican Museums and the Rialto Bridge in Venice.

To fully understand the history of lotteries in America, one must recognize the fact that the American colonies, at the time of their founding, lacked the capital, both in the public and private sector, needed to start the process of economic and cultural development.

As the English settled in America, the model of development that stressed private rather than public investment motivated them. Royalty in England were simply unwilling to spend their own money or tax their subjects to subsidize the development of the colonies, and lotteries became an important method of raising capital for both the public and private initiatives. In fact, the “Great Standing Lottery” held in London in 1612, was staged to help bail the Virginian Company, the corporation in charge of the settlement of Virginia, out of debt. A notable outcome for the first drawing of this lottery was that Anglican churches held two of the three winning tickets.

Perhaps one of the most poignant lottery stories is that of the abortive attempts to bail Thomas Jefferson out of an \$80,000 debt by holding a lottery on his behalf on the 50th anniversary of the adoption of the Declaration of Independence, an anniversary that coincided with the precise day of his death.

In the 1700s, many other founding fathers also supported American lotteries and used them for projects such as the financing of cannons for the Revolutionary War (Benjamin Franklin), the rebuilding of historic Faneuil Hall in Boston (John Hancock) and the financing of construction on the Mountain Road, which opened westward expansion from Virginia (George Washington).

The period from 1740 to 1820 witnessed an explosion of public works construction, such as roads, bridges, and canals, much of which was financed by lottery proceeds.

Many of America’s elite, private universities, Yale, Princeton, Harvard, University of Pennsylvania, and Columbia, have buildings funded through the proceeds of lotteries. The fact of the matter was that lacking the endowments built up over centuries by places like Oxford and Cambridge, American higher education had no choice but to resort to lotteries.

Many of the principal religious denominations of America (ironically, many of those which would, in the middle part of the 19th Century, lead the fight against lotteries) actually depended heavily on lotteries to get their start.

While very few people in America would have denied there was a need to raise money to build colleges, bridges, roads, or churches, then as now, America differed over whether lotteries were the appropriate way to raise those funds. The arguments for and against lotteries have not changed significantly over the course of the 200 years, from the 17th Century Puritan and Quaker denunciations of all games of chance, to those similarly voiced by fundamentalist Protestant religious groups in the 19th and 20th Centuries.

The concern about gambling, however, was often overwhelmed by the recognition that the lottery was a means that enabled the accomplishment of useful public projects. William Ames, a Cambridge teacher of many of the leaders of the Massachusetts Bay colony, denounced the playing of the lottery solely for the purpose of gain, but defended lotteries as long as they were intended for some pious end. The settlers of New England would find many virtuous purposes toward which to direct lottery proceeds. During the colonial period, the

New England colonies authorized more lotteries than any other region of the country, which benefited colleges, churches, and every other manner of public works construction one could think of.

By the time of the Revolution, most every American colony joined the New England colonies in using lotteries as a primary method for financing both public works and private economic development. This reliance on lotteries was the result of the coming together of two powerful forces, a desperate need for capital to fight the war against Great Britain and the reluctance to impose taxes. It is during this time in history that some of America's most respected statesmen publicly campaigned for lotteries as a means of raising revenues. The two most well known for this were Thomas Jefferson and Alexander Hamilton.

Thomas Jefferson described a lottery as a "salutary instrument . . . where men run small risks for the chance of obtaining a high prize." It was, he said, a "tax laid only on the willing," and was therefore more accepted than any other form of direct taxation. Alexander Hamilton described lotteries as a means by which an ordinary man could "hazard a trifling sum for the chance of considerable gain." Hamilton offered advice, which has been relevant to every lottery organizer since that time. He said there were two cardinal rules for a successful lottery: keep it simple, so that everyone understands the rules, and keep the tickets cheap, so that everyone could afford to participate.

The period of time from 1800 to the Civil War was the most active time for lotteries. There were an incredible number of lotteries in America during this period, some held for public purposes, some for a mixture of public and private purposes, and some for private purposes as entrepreneurs attempted to raise money for their own projects. It was at this time in history that charges of fraud and deception, which coincided with a resurgence of religious opposition to lotteries as being sinful, began.

By the 1820s, there was a vast array of lotteries being conducted, sometimes at the same time on the same day, and although the lottery ticket sellers became increasingly clever in their efforts (P.T. Barnum was a lottery agent), the market was overwhelmed. Because of that, there were many instances where the proceeds from the lottery were not sufficient to pay the prizes, a problem that often resulted in lottery organizers leaving town with the money in hand before the drawing could be held.

Charges of fraud and deception surrounded lotteries of the 19th Century, and the two most commonly believed reasons for these were dishonest lottery promoters and increasing religious opposition. There were, however, many other factors, including the growth of the banking institution, which offered an alternative means for entrepreneurs to raise money; an economic boom in the 19th Century which created sources of excess capital that could be used for investment in public works; and lastly, the willingness of state governments to step in and raise taxes to finance worthwhile public projects.

The full history of the decline of the lottery in America lasted from the Civil War until the resumption of the lottery in 1964 when New Hampshire established a state-run lottery for the purpose of raising money for education. New York, which had been the State to pass the first constitutional prohibition of lotteries in the United States in the 1820s, followed New Hampshire's return into the lottery business in 1967. In 1971, the State of New Jersey started their lottery and introduced a computer-based weekly game, which offered inexpensive tickets (50 cents), convenience of sale, and a weekly prize of \$50,000. In its first year of operation, the New Jersey Lottery grossed \$142.5 million and set the trend for the lottery industry. New York and New Hampshire revamped their systems, and other states introduced lotteries utilizing New Jersey's operation as a model.

Lotteries, through the years, have become more diversified. The vast array of lottery games in existence today caters to a variety of consumer tastes. These changes are largely attributable to the work of marketing experts. With greater selections, come increased sales. Considerable changes and new possibilities were introduced in

lotteries through major technological innovations such as centralized on-line computer systems (1971) and magnetic strip tickets (1992).

By developing and tailoring products to the needs of clientele, the lottery has established itself as an everyday element in today's society.

History of the Rhode Island Lottery

In 1744, Rhode Island's first lottery raised money for a bridge at Weybosset Street in Providence. Tickets cost about \$12 each and raised approximately \$6,500 for the bridge. Several other lotteries were conducted throughout the 1700s including a lottery used to partially finance the building of a brick Colony House, which became Rhode Island's first State House following the Declaration of Independence. One of the most successful lotteries in Rhode Island was the one authorized to build Thames Street in Newport. It paid over \$1 million in prizes and was so popular that the people of Newport were able to build, pave and extend streets throughout the city.

On November 6, 1973, more than a three to one margin passed a Constitutional Amendment to create a lottery in Rhode Island. The amendment mandated that the General Assembly prescribe and regulate all future lotteries in Rhode Island. Legislation was passed to start the Lottery in March 1974, and it began two months later in May. The original purpose of the Rhode Island Lottery was to make up for the revenue lost from allowing the value of a trade-in automobile toward the sales tax liability on a new automobile.

The Lottery's first drawing was held at the State House on May 30, 1974. This weekly 50-cent game had a top prize of \$50,000. Rhode Island was the first state to televise a live lottery drawing in January of 1975, at no expense to the Lottery, which is still the case today. That same year Rhode Island became the first state to have a weekly lottery television program. The Numbers Game began on February 13, 1976 and continues today.

The first instant ticket game, Play Ball, was introduced on May 11, 1976. Since that time an additional 741 instant ticket games have been introduced.

On-line games started in February of 1978, and Lottery sales doubled with this new addition. The 4/40 Game began in the spring of 1981, with variations to that game being made throughout the years.

The Multi-State Lottery Association (MUSL) was formed in 1988 for the purpose of affording small states the opportunity to offer games with a higher jackpot than their population alone would generate. Along with Rhode Island, the initial members were the District of Columbia, Iowa, Oregon, Kansas and West Virginia. The first such game was called Lotto-America, which was replaced with PowerBall® on April 22, 1992. In February of 1998, Rhode Island replaced the Multi-State Daily Millions Game with the introduction of its own lotto game called Roll Down. This lotto game was succeeded by Easy Win in March 2000, Money Roll in November 2000 and the current game of Wild Money in January 2002. The Rhode Island Lottery began offering Mega Millions® on January 30, 2010 through its participation in the Multi-State Lottery Association.

Keno was introduced in the State on September 13, 1992, becoming the second U.S. Lottery (Oregon was first) to do so. Around this same time, Video Lottery Terminals (VLTs) went on-line at the State's two pari-mutuel facilities.

On July 1, 2005, due to the separation of powers law previously passed, the Rhode Island Lottery Commission was disbanded; and the Division of Lotteries of the Rhode Island Department of Administration was formed.

On July 1, 2006, the Division of Lotteries became the State Lottery Division of the State of Rhode Island Department of Revenue.

History of Lottery Games

Lotto Games

The Germans were the first to bring the modern lotto game to the market. Norwest Lotto in northwestern Germany launched the first game on October 9, 1955. Players simply marked 6 figures out of a total of 49 on their coupon. The idea quickly took off, and many other countries soon followed the Germans' lead.

With the "quick pick" feature, players can have the computer generate their numbers at random. Most lotteries offer this option.

Alexandre Fichet (1799-1862), who designed a system to replace manual draws using balls, developed technology for lotto drawings in France. He invented a way to carry out lottery drawings using wheels with numbers from 1 to 9 around the rim. At the end of the wheel's rotation, the winning number was clearly shown through a window.

In 1985, the launch of Tri-State Lotto, the first multi-state lottery, linked Maine, New Hampshire and Vermont state lotteries.

Instant Tickets

The first instant lottery ticket was marketed in 1974 in the Commonwealth of Massachusetts, which became the first state lottery to develop and sell an instant game. Today, all state lotteries offer instant tickets, and this type of lottery game is recognized as one of the most popular lottery offerings in North America.

Video Lottery

Although the invention of the "slot" machine dates back to 1890, it was only in 1976 that the first black and white video technology was developed. Color video terminals were launched on the market several months later.

Initially, video lottery machines were only associated with casinos; however, in 1985, the State of Nebraska changed its legislation and allowed the Nebraska Lottery to test a video lottery that was not linked to a central system. The experiment was terminated that same year.

Several years later, when the South Dakota Lottery was searching for new sources of revenue, it took up the idea of video lottery. In March of 1989, legislation allowing the establishment of the first server-connected video lottery was approved. In the fall of 1990, South Dakota offered the first operational video lottery in all of the United States. By 1992, Oregon, Rhode Island, and Louisiana had video lottery terminals up and running in their respective states.

Keno

Keno originated in China more than 2,000 years ago. Legend has it that this game financed the Great Wall of China. The original Chinese game was played with characters from the "Thousand Character Classic", an ancient poem of luck by Confucius. Keno subsequently spread far beyond the borders of China and was well

established in both Europe and the United States by the turn of the 20th Century. Today, Keno is a very popular lottery offering because of its flexibility in the number of spots that can be played, which in effect means there are actually several games going on at the same time all with different odds of winning a prize. Daily Keno drawings have proven more successful than those held two or three times a week. Rhode Island is one of only a handful of lotteries offering a new Keno draw every 4 minutes.

Rhode Island Lottery Product Offerings

The Rhode Island Lottery provides the opportunity to participate in the following games:

Instant Tickets

Instant (or scratch) tickets are played by scratching the latex covering off the play area on the ticket. In order to win, the player must match two or three of a kind, get like symbols or wild features. Instant ticket offerings in Rhode Island include card games, as well as whimsical, sports, money, and holiday themes. Also offered are extended play games with second chance drawings for additional prizes, including New England Patriots and Boston Red Sox game tickets and a trip to Hollywood to play Wheel of Fortune.

Daily Numbers

The Daily Numbers game has been very popular in Rhode Island since its inception in 1976. Players can wager on 2, 3, or 4 digits. Wagers on 3 and 4 digits can be played in exact or any order. Players can select their own numbers or utilize the computer “quick pick.” The Daily Numbers drawing is televised live Monday through Saturday at 7:00 p.m. and at 6:30 p.m. on Sunday.

The Lottery added an Instant Match feature to the Daily Numbers game in September 2002. Instant Match offers the player the chance to win up to \$500 instantly on a Daily Numbers ticket, for an additional \$1 per wager.

Keno

Keno was introduced in September of 1992 and quickly proved to be a very popular game. Rhode Island Keno has a 10 of 20 of 80 matrix, with a \$100,000 top prize. Players can wager on 1 to 10 numbers (spots) utilizing their own number selection or a computer “quick pick.” In January of 2000, Keno drawings increased from every 5 minutes to every 4 minutes. These Keno drawings occur from 5:00 a.m. to 12:45 a.m., Monday through Saturday and 7:00 a.m. to 12:45 a.m. on Sunday. In April of 2001, Keno Plus was introduced. Players have the option to purchase this feature that could increase their winnings by ten times, thus giving Keno players the potential to win up to \$1,000,000. Free Ride began in March of 2008 offered players a chance to win a progressive jackpot with a starting amount of \$1,200 that kept growing until someone won. The highest jackpot of \$35,348 was won on April 10, 2010. Keno Free Ride ended in April 2011, with a jackpot of \$8,938. Multi Chance Keno started in April 2011, and offers players a chance to win free bonus games and higher prizes up to \$500,000.

PowerBall[®]

PowerBall[®] is a Multi-State Lottery Association game offered in 42 states (including Rhode Island), plus the District of Columbia and U.S. Virgin Islands. Players select “5 out of 59” numbers and a PowerBall[®] “1 out of 39.” Players can select their own numbers or utilize a computer “quick pick.” Jackpots start at \$20 million and grow by a minimum of \$5 million for each drawing not producing a jackpot winner. Televised drawings

are shown on Wednesday and Saturday at 10:59 p.m. PowerPlay[®], which is a multiplier for PowerBall[®] winnings, was introduced in March of 2001. Players who choose the PowerPlay[®] option on their PowerBall[®] ticket have the chance to increase their winnings by up to 5 times; however, the multiplier does not apply to a jackpot win.

Mega Millions[®]

The Rhode Island Lottery began offering Mega Millions[®] on January 30, 2010 through its participation in the Multi-State Lottery Association. Players select “5 out of 56” numbers and a Mega Ball “1 out of 46.” Players can select their own numbers or utilize a computer “quick pick.” Jackpots start at \$12 million and grow by a minimum of \$5 million for each drawing not producing a jackpot winner. Drawings are held on Tuesday and Friday at 11:00 p.m. Megaplier[®], which is a multiplier option for Mega Millions[®] winnings, allows players who choose this option on their Mega Millions[®] ticket to have the chance to increase their winnings by up to 4 times; however, the multiplier does not apply to a jackpot win.

Wild Money

Wild Money is an on-line game with a starting jackpot of \$20,000 that continues to grow until a player matches 5 numbers selected out of a field of 35. Its first jackpot of \$315,869 was won on April 13, 2002 and the highest was \$601,207 on March 25, 2006. Drawings are held Tuesday, Thursday, and Saturday at 7:30 p.m.

Raffle

Raffle is a product offering in which sales run for a limited period of time, with a set number of tickets and guaranteed prizes. The third run of this game began September 10th with sales grossing \$2.4 million. Tickets cost \$20 and the drawing was held on December 31, 2010. For this run, the top prize was \$1.0 million with subsidiary grand prizes totaling \$200,000. A fourth run is being developed with a drawing date of December 31, 2011. There will also be second chance drawings for additional prizes.

Video Lottery

Video Lottery debuted in Rhode Island in September of 1992. There are a total of 5,845 video lottery terminals (VLTs) located in the State’s two pari-mutuel facilities, Twin River and Newport Grand. As of June 30, 2011, Twin River has 4,752 VLTs and Newport Grand has 1,093 VLTs. Various virtual and multi-layer display games are offered on the VLTs. The Cashola progressive game ended in May 2011, with a winning jackpot of \$4.8 million. The progressive game was replaced on July 15, 2011 with IGT’s Mega Hits game.

Pull Tabs

Rhode Island General Laws mandate that pull tab tickets be sold only by non-profit organizations. The Rhode Island Lottery oversees the sale of pull tab tickets to these groups.

Rhode Island Economic Outlook

Rhode Island’s population remained approximately the same over a twelve month period at 1.05 million as of July 1, 2010. As of June 2011, the unemployment rate was 11.6%; which was above the national rate of 9.2%.

Lottery Industry Economic Outlook

Despite current economic conditions, the United States Lottery Industry experienced slight growth in fiscal year 2010. Based on unaudited figures from the North American Association of State & Provincial Lotteries (NASPL), sales increased from \$58.3 billion in fiscal year 2009 to \$58.8 billion in fiscal year 2010, up 0.97%.

Highlights of Fiscal Year 2011

- For fiscal year 2011, \$354,860,987 was transferred to the State's General Fund.
- Fiscal year 2011 produced record video lottery cash-in sales of \$2.9 billion with a resulting net terminal income (sales less prize awards) of \$492.6 million. Additional State of Rhode Island Promotional and Marketing funds were provided with the objective of increasing the net revenues.

GFOA Certificate of Achievement

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the Rhode Island Lottery for its comprehensive annual financial report (CAFR) for the fiscal year ended June 30, 2010. This was the fourteenth consecutive year that the Lottery has achieved this prestigious award (1997 through 2010). In order to be awarded a Certificate of Achievement, a governmental unit must publish an easily readable and efficiently organized CAFR. This report must comply with both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. The Rhode Island Lottery received a certificate on its first attempt, in May of 1998 and on each subsequent attempt. We believe that our current CAFR continues to meet the Certificate of Achievement Program's requirements, and we are submitting it to the GFOA to determine its eligibility for another certificate.

Accounting Systems and Procedures

The Rhode Island Lottery operates the Lottery fund, an enterprise fund that, like a private business, utilizes the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America. Under the accrual basis of accounting, revenues are recognized when earned; and expenses are recognized at the time the related liabilities are incurred.

Budgetary Controls

The operating budget of the Rhode Island Lottery is submitted to the State Budget Office, through the Department of Revenue, for inclusion into the Governor's State Budget to the General Assembly. The State Budget is ultimately legally enacted by the General Assembly.

The Revenue Estimating Conference continues to adopt revenue estimates from the Lottery, which are incorporated into the State Budget.

Internal Control Environment

Management of the Lottery is responsible for establishing and maintaining an internal control structure designed to ensure that assets are protected from loss, theft, or misuse and to ensure that the accounting system allows for recovery of complete, accurate and timely financial information. The structure is designed to provide reasonable assurance that these objectives are met.

The Lottery has required that Twin River and Newport Grand, the VLT facilities, contract with an outside IT Security Auditing Firm to perform an annual Independent IT security review of their respective VLT Player Tracking System Security Controls and Procedure compliance.

Since the Lottery manages a valuable ticket inventory, controls the disbursement of prizes and regulates video lottery activity at the State's two pari-mutuel facilities, the following steps are taken to ensure the operations remain honest and secure:

- Employing an Information Security Manager.
- Employing specialized security staff.
- Maintaining secure lottery facilities and limiting access to them.
- Performing background checks on retailers, vendors, and employees.
- Printing lottery tickets with special security features.
- Independent Information Technology security audits of Lottery networks.
- Implementing additional Information Technology security control requirements over each video lottery facility's system to protect the integrity of the data within the systems and the financial data used by the Lottery.
- Providing a variety of access and other controls in the computer system.
- Implementing a Video Lottery System Monitoring Plan to ensure the integrity of video lottery games and to ensure that control procedures are operating as designed.
- Monitoring video lottery terminals on a daily and weekly basis and reconciling to a cash management system.
- Processing daily transaction data of all retailer activity by Lottery personnel using the Lottery's internal control system programs and reconciling transactions to reports generated by the on-line system.
- Implementation of comprehensive information security objectives for the Lottery's on-line and video lottery systems as provided by its central system provider.

The Lottery currently has 50 employees, all of whom are located at the headquarters in Cranston, Rhode Island. Separated from the headquarters, the drawing studio is located at the Twin River pari-mutuel facility.

Future Initiatives

The Lottery continues to enhance its website to allow for second-chance drawings. These drawings allow players to participate by logging onto the website and entering specified serial numbers from tickets that have been purchased at Retailer locations.

Security controls are being developed for the Retailer website. This Retailer website will allow Retailers to access financial and other information specific to their business operation, serve as a point of contact for the Retailer with the Lottery, allowing Retailers to update their information on file with the Lottery, ask questions, submit suggestions, and allow Retailers to participate in Lottery-sponsored promotions. When security controls are completed, the Retailer website will be ready for release.

The Lottery continues working with the Rhode Island College Gambling Studies Project, industry professionals, the Massachusetts and Connecticut Councils on Problem Gambling, and the National Council on Problem Gambling. Lottery representatives will be participating in upcoming workshops and conferences to remain as proactive as possible in the efforts to prevent and treat problem gambling. A redesign of the questionnaire utilized for those calling the Lottery's 24-hour problem gambling helpline, which is administered by the United Way of Rhode Island, has been completed. This redesign has resulted in the securing of additional pertinent data from callers.

A new Powerball® game is scheduled for implementation in January 2012. Ticket price will be increased from \$1 to \$2, with the starting jackpot increasing from \$20 million to \$40 million, as well as increases in the subsidiary prize levels.

The Lottery is in the process of establishing a regional game, with other New England states, estimated to begin in March 2012 with the chance to win a prize of lifetime payments as well as other prizes.

The Twin River and Newport Grand video lottery terminal facilities continue to coordinate their regular promotions with their promotional points programs. Both facilities also plan to continue providing entertainment to complement their marketing programs and generate additional revenue. Additionally, reimbursement for certain marketing expenses are paid to the facilities after specific statutory requirements are met, for those marketing expenses as authorized and allowed by the Lottery.

The Lottery will be replacing the current Video Lottery Central System, which supports the VLTs at Twin River and Newport Grand, with a new system scheduled to be fully implemented by December 31, 2012. The Lottery continues to work with its Central System Provider, GTECH, in the development of the requirement specifications and to plan out the implementation process of the new system.

Independent Audit

The Rhode Island General Laws require an annual audit to be performed by the State Auditor General. The fiscal year 2011 audit of the financial statements has been completed in accordance with auditing standards generally accepted in the United States of America and *Government Auditing Standards*. The Independent Auditor's Report on the Lottery's financial statements is included in the financial section of this report. Also, in accordance with *Government Auditing Standards*, the Independent Auditor's Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*, was issued by the State Auditor General.

Acknowledgements

Preparation of this report was accomplished with the significant efforts of Sandra Lee, Anne Paglia, Meghan Richardson, and Gina Grant.

This Comprehensive Annual Financial Report reflects our commitment to maintain the Rhode Island Lottery's financial statements and record keeping systems in compliance with the highest standards of accountability.

INDEPENDENT AUDITOR'S REPORT

Joint Committee on Legislative Services, General Assembly,
State of Rhode Island and Providence Plantations:

We have audited the accompanying financial statements of the Rhode Island Lottery (Lottery), an enterprise fund of the State of Rhode Island and Providence Plantations, as of and for the year ended June 30, 2011, as listed in the table of contents. These financial statements are the responsibility of the Lottery's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As discussed in Note 2(b), the financial statements present only the Lottery and do not purport to, and do not, present fairly the financial position of the State of Rhode Island and Providence Plantations, as of June 30, 2011, the changes in its financial position, or, where applicable, its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In our opinion, the financial statements referred to previously present fairly, in all material respects, the financial position of the Lottery as of June 30, 2011, and the changes in financial position and cash flows thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

As more fully described in Note 2(k) to the financial statements, the Lottery changed its reporting of video lottery revenue for fiscal 2011 from the gross video lottery amounts previously reported to a net presentation.

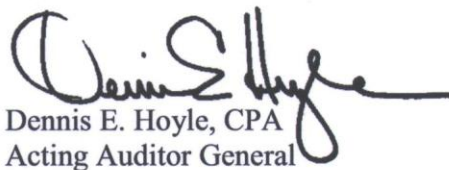

Joint Committee on Legislative Services, General Assembly,
State of Rhode Island and Providence Plantations:

As more fully described in Note 13(b) to the financial statements, the Lottery's two video lottery facility operators, from which the Lottery derives a significant portion of its revenue, have experienced financial difficulties; and, as described in Note 13(c), pending legislation to allow casinos in nearby Massachusetts, if passed, could adversely impact future Rhode Island video lottery revenue.

In accordance with *Government Auditing Standards*, we have also issued our report dated September 29, 2011 on our consideration of the Lottery's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

The Management's Discussion and Analysis on pages 17 through 25 is not a required part of the basic financial statements but is supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise the Lottery's basic financial statements. The supplementary information included in Schedule 1 is presented for purposes of additional analysis and is not a required part of the basic financial statements. Schedule 1 has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole. The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

Dennis E. Hoyle, CPA
Acting Auditor General

September 29, 2011

RHODE ISLAND LOTTERY

Management's Discussion and Analysis

Management of the Lottery provides this *Management's Discussion and Analysis* of their financial performance for the readers of the Lottery's financial statements. This narrative provides an overview of the Lottery's financial activity for the fiscal year ended June 30, 2011. This analysis is to be considered in conjunction with the financial statements to provide an objective analysis of the Lottery's financial activities based on facts, decisions, and conditions currently facing management.

Understanding the Lottery's Financial Statements

The Lottery, a division of the Department of Revenue of the State of Rhode Island and Providence Plantations (State), is accounted for as an enterprise fund that reports all assets and liabilities using the accrual basis of accounting, much like a private business entity. In accordance with accounting principles generally accepted in the United States of America, this report consists of a series of financial statements, along with notes to the financial statements and a supplementary schedule detailing operating revenue and the cost of gaming operations for each lottery game. The financial statements immediately follow this *Management's Discussion and Analysis* and are designed to highlight the Lottery's net assets and changes to those assets resulting from Lottery operations.

The most important relationship demonstrated within the Lottery's financial statements is the requirement that the Lottery transfer all net income to the State's General Fund. Accordingly, the primary focus of these financial statements is determining net income available for payment to the State's General Fund rather than the change in net assets of the Lottery. It is also important to note that most financial statement balances have a direct relationship to revenue. Generally, as lottery revenues increase, the amount paid to the State's General Fund also increases. Similarly, increases in revenue for a particular lottery game result in direct increases to the related prize awards and commissions expense.

Most assets included on the Statement of Net Assets represent current amounts such as cash and accounts receivable from Lottery retailers. Most liabilities represent current prize awards owed, vendor commission payments, and amounts due to the State's General Fund. Current assets approximate the amounts required to satisfy current liabilities at year end.

The deficiency in net assets of \$7.5 million reported at June 30, 2011 relates entirely to the Lottery's sale of its exclusive rights to operate its gaming systems. The Lottery sold this exclusive right to its current gaming systems provider for a 20-year period at a cost of \$12.5 million and immediately paid the proceeds to the State's General Fund. According to the terms of the agreement, if for any reason, this contract is voided prior to its completed term; the Lottery will be required to refund a pro-rata share of the sales price to the gaming system provider. In accordance with generally accepted accounting principles, the Lottery will recognize the revenue related to this transaction over the 20-year life of the contract.

Financial Highlights

- The Lottery transferred \$354.9 million to the State's General Fund for the fiscal year ended June 30, 2011, an increase of \$10.2 million in net income transfers over the prior fiscal year. The increase is notable in light of current economic conditions.
- Net video lottery revenue increased by \$24.8 million or 5.3% in fiscal 2011.
- Keno sales increased by \$3.4 million, a 4.31% increase over fiscal year 2010.

RHODE ISLAND LOTTERY

Management's Discussion and Analysis

- The Lottery implemented a video lottery incentive program, designed to enhance the overall promotion and marketing of the State's video lottery operations by reimbursing its video lottery facilities for a share of certain qualified marketing and promotional expenses. The Lottery reimbursed the video lottery facilities \$2.2 million for qualified expenses incurred in fiscal 2011.
- Twin River, the Lottery's largest video lottery facility, received approval of their reorganization plan by the United States Bankruptcy Court during fiscal 2011. Twin River's reorganization, once finalized, should stabilize the financial position of the facility.

RHODE ISLAND LOTTERY

Management's Discussion and Analysis

The majority of the Lottery's assets consist of cash (including amounts invested in cash equivalent type instruments) and accounts receivable derived from sales of the Lottery's games. At June 30, 2011, the Lottery's assets included \$18.2 million in cash and cash equivalents as compared with \$14.4 million at June 30, 2010. The Lottery's accounts receivable approximated \$4.1 and \$2.8 million, respectively, at June 30, 2011 and 2010.

The Lottery's liabilities included at the balance sheet date are amounts owed for vendor payables, prize obligations and a residual amount owed to the State's General Fund for June's net operations and operating expenses. The amount owed to the General Fund for June's net operations approximated \$2.7 million at June 30, 2011 and \$1.6 million at June 30, 2010. At June 30, 2011, vendor payables, made up largely of commissions due to video lottery participants, and prize obligations, attributable mostly to instant ticket games and PowerBall®, were \$12 million and \$5 million, respectively. In comparison, vendor payables and prize obligations at June 30, 2010 were \$10.5 million and \$5.2 million, respectively.

The majority of the Lottery's assets represent current resources necessary to pay the current liabilities owed to vendors, prize winners, video lottery participants, and ultimately the State's General Fund.

The deficiency in net assets reported at June 30, 2011, as previously explained, relates to the Lottery's immediate transfer, in a prior fiscal year, to the State's General Fund of all proceeds received from the sale of its exclusive rights over the operation of its gaming systems.

Lottery Operations

	June 30, 2011	June 30, 2010 *

* Certain 2010 amounts have been reclassified or restated to conform to the current year presentation. See note 2 (k) to the notes of the financial statements.		

RHODE ISLAND LOTTERY

Management's Discussion and Analysis

Beginning in fiscal 2011, video lottery terminal revenue is presented as the net amount of video lottery terminal inputs (both cash and credits redeemed at the terminal) minus terminal outputs (all cash credit slips issued by the terminal). The Lottery, in previous financial reports, reported video lottery terminal activity on a gross basis with gross revenue (terminal inputs) and prize awards (terminal outputs) being reported. Both presentations are acceptable under generally accepted accounting principles, however recent accounting guidance has indicated that most gaming entities report video lottery terminal activity on a net basis. This change in financial reporting will improve the comparability of the Lottery's financial activity with other State lotteries that offer video lottery games. The Lottery has restated prior year video lottery financial activity reported in this Management Discussion and Analysis to conform to this new net presentation. This change has no impact on the Lottery's operating income or Transfers to the State General Fund amounts reported on the Statement of Revenue, Expenses, and Changes in Net Assets.

Revenue

Traditional Lottery

- Traditional Lottery games consist of on-line and instant ticket games. Distribution of the year's traditional lottery revenue was as follows:

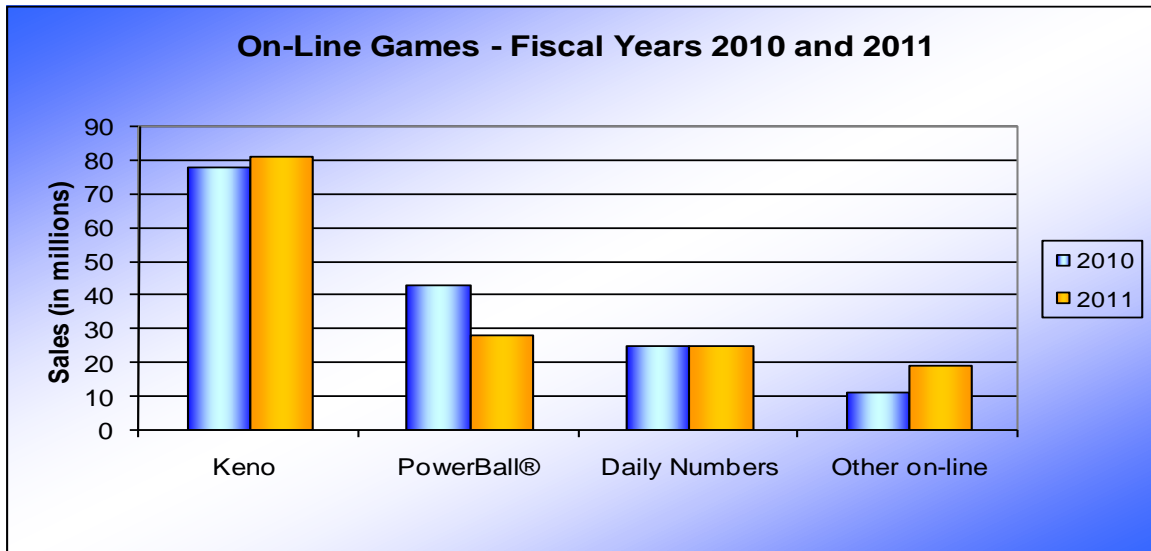

- Instant ticket revenue for the fiscal year ended June 30, 2011 decreased \$.7 million or .97% from the preceding fiscal year.
- On-line games offered were PowerBall®, Mega Millions®, Keno, Daily Numbers, Raffle and Wild Money at June 30, 2011. In total, on-line revenue decreased by \$3.3 million, which is mostly attributable to decreased Powerball sales.
- PowerBall® sales for the fiscal year ended June 30, 2011 decreased by \$14.5 million. Much of Powerball's decrease is explained by the increase in sales for a full year's offering of the Mega Millions® game, a second multi-state jackpot game which was first offered in Rhode Island in January 2010. Sales for Mega Millions in fiscal 2011 increased by \$7.5 million as compared to fiscal 2010 when the game was only available to the public for half the fiscal year. Overall, sales for the two multi-state jackpot games combined, decreased by \$7 million when compared to fiscal 2010.

RHODE ISLAND LOTTERY

Management's Discussion and Analysis

The following graph depicts the Lottery's on-line sales for the fiscal years ended June 30, 2010 and 2011.

Video Lottery

- Video lottery net revenue increased \$24.8 million. The continued increase in reported video lottery net revenue is mostly attributable to the Lottery's largest video lottery facility, the popularity of virtual multi-player video table games such as blackjack and roulette that simulates the excitement of table games, and increases in State authorized player promotional credits and reimbursable marketing expenditures.
- The Lottery continued to allot credits to each video lottery facility for patrons enrolled in their player rewards program. The credits, which approximated \$19.3 million in redeemed free play during fiscal year 2011, are part of increased marketing efforts to increase video lottery revenues. These credits are designed to entice more frequent visits by patrons to the facility.

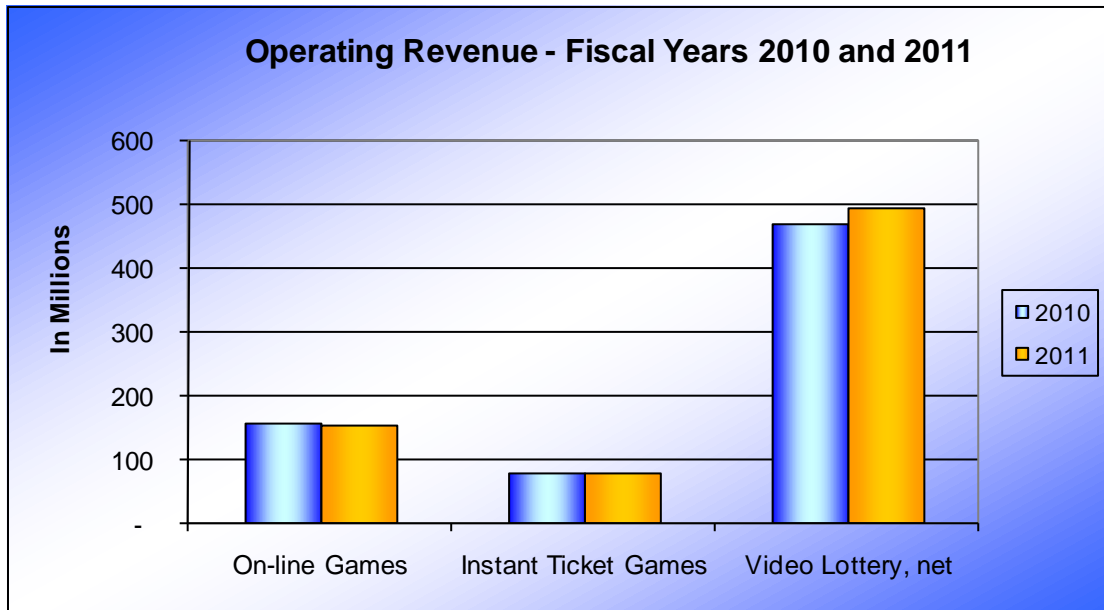

Distribution of the year's video lottery revenue was as follows:

RHODE ISLAND LOTTERY

Management's Discussion and Analysis

The following graph depicts the Lottery's on-line, instant, and video lottery operating revenue for the fiscal year ended June 30, 2010 in comparison to fiscal year ended June 30, 2011.

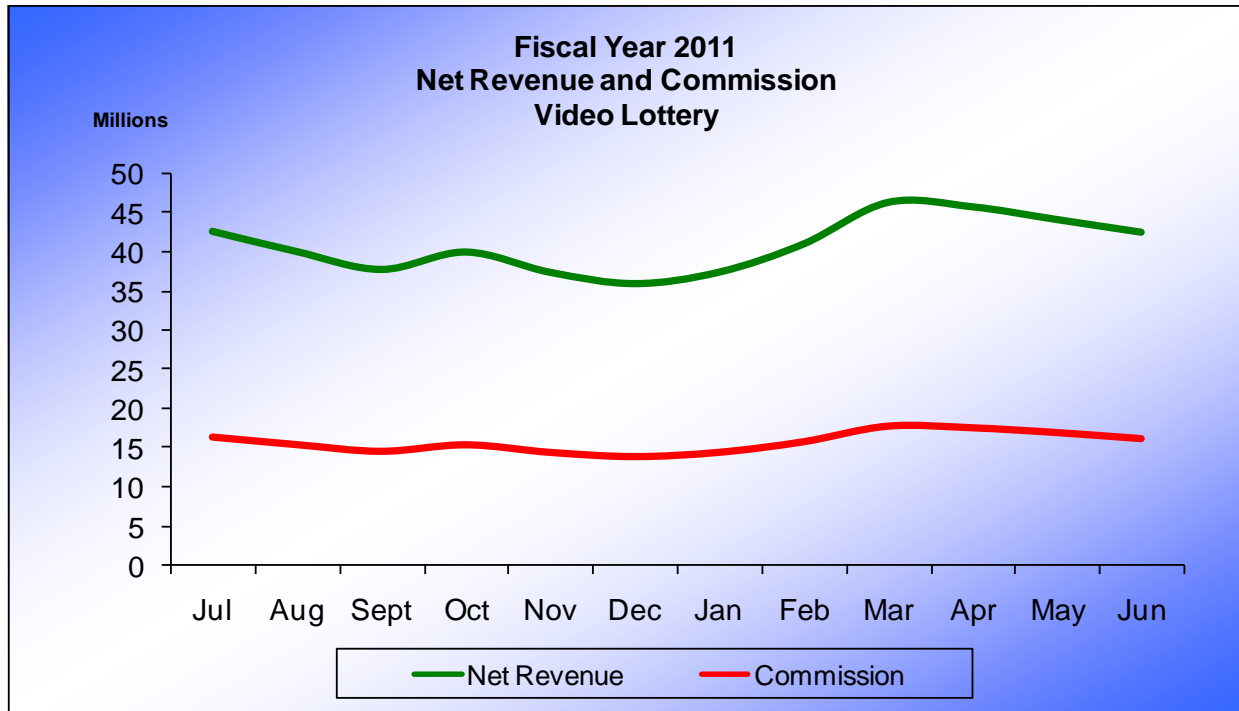

Commissions and Prize Awards Expense

As the following graphs depict, the Lottery's most significant expenses (commissions and prize awards) are predictable because they have a direct correlation to sales. As lottery revenues increase, so do the related prizes and commissions paid by the Lottery. While each Lottery game has a designed prize payout structure, the overall amount paid as prize awards expense is consistent in relation to sales. The second graph below compares video lottery net revenues to related commissions.

RHODE ISLAND LOTTERY

Management's Discussion and Analysis

Lottery Transfers

Net income transferred by the Lottery for the fiscal years ended June 30, 2011 and June 30, 2010 was \$354.9 million and \$344.7 million, respectively. All fiscal 2011 transfers were made by the Lottery directly to the State's General Fund, as required by the General Laws.

RHODE ISLAND LOTTERY

Management's Discussion and Analysis

Debt Administration

Jackpot prizes awarded under PowerBall® and Mega Millions® are satisfied through investments purchased by the Multi-State Lottery Association (MUSL). MUSL purchases United States government obligations, which are held in irrevocable trusts established by MUSL for the benefit of participating state lotteries. Accordingly, the Lottery does not record an obligation for PowerBall® jackpot awards which are payable in installments from funds provided by MUSL.

Capital Assets

The Lottery purchases and maintains property and equipment necessary to sell lottery products, pay prizes and perform other lottery operations.

For further information, refer to Notes to Financial Statements, Note 4.

Potential Factors Impacting Future Operations

The Lottery's mission is to maximize revenues for the purpose of maximizing payments to the State's General Fund. A continuous assessment of the State's financial environment and the Lottery's own product lines and operations are essential to accomplish this mission. The following considerations have been presented to inform those interested in the Lottery's operations about potential factors that could affect future operations:

- During fiscal 2011, the Lottery exercised the first amendment to the Master Video Lottery Contracts with its video lottery facilities, Twin River and Newport Grand. These amendments cover a second five year term under the original contracts that run through 2015. These extensions allow the facility to continue its promotional play program where the facility can reward loyal patrons with free play up to an amount of 4% of the facility's prior year net terminal income. The extension also requires the Lottery to reimburse the facility for its net terminal income share of certain qualified marketing and promotional expenses (see Note 12(b) and 12(c) for complete details). This requirement assists the facilities with the cost of marketing the State's video lottery gaming operations while ensuring that the facilities invest appropriately in the promotion of their facilities.
- Revenues overall are down at many gaming venues throughout New England due to current economic conditions. Competition among gaming venues has increased, resulting in more promotional allowances, player reward incentives being offered, and increased marketing efforts.
- The Lottery's video lottery operations currently compete with casinos in nearby Connecticut. In addition, Massachusetts lawmakers have put forth a bill to allow three casinos and one slot parlor in that State. It is anticipated that, if the law passes, there could be an adverse effect on the amount of revenue derived from video lottery facilities in Rhode Island. The Lottery and the State continually monitor the risk to gaming operations resulting from competition in nearby states.
- Recently enacted legislation has authorized a statewide ballot referendum that allows the voters of Rhode Island to approve the expansion of gaming at the Twin River video lottery facility located in Lincoln, RI. The expansion would allow Twin River to offer casino style gaming (i.e., table games) to the public subject to the operational control by the Lottery and/or Department of Business Regulation. This referendum is also subject to local (Town of Lincoln) voter approval.

RHODE ISLAND LOTTERY

Notes to Financial Statements

(1) Organization

The Lottery was created in 1974 under the General Laws of the State of Rhode Island (General Laws) to establish and operate lottery games for the purpose of generating resources for the State's General Fund. The Lottery is a division of the Department of Revenue of the State of Rhode Island (the State).

The Lottery offers:

- On-line games that include: Daily Numbers, Keno, Wild Money, PowerBall[®], Mega Millions[®], and Raffle. Powerball[®] and Mega Millions[®] are multi-state games operated in accordance with rules and agreements established by the Multi-State Lottery Association (MUSL).
- Instant tickets sold through licensed lottery retailers.
- Video lottery games which are located at two licensed facilities.

Prize payout percentages and amounts required to be paid to the State's General Fund as stipulated in the General Laws are summarized below for the various games operated by the Lottery.

<u>Game</u>	<u>Prize Payout</u>	<u>Mandated Payments to the State</u>
Daily Numbers Raffle Instant Ticket Games PowerBall [®] Mega Millions [®] Wild Money	Not less than 45% or more than 65% of sales	Payments to the General Fund - not less than 25% of ticket sales
Keno	Not less than 45% or more than 72% of sales	Payments to the General Fund - not less than 15% of ticket sales
Video Lottery	Prize payout not established by law	Payments to the General Fund - net terminal income (video lottery credits purchased less credits redeemed or redeemable, including prize contributions to multi-state video lottery progressive jackpots) minus commission payments and incentive program reimbursements.

RHODE ISLAND LOTTERY

Notes to Financial Statements

(1) Organization - (Continued)

(a) *PowerBall*[®]

The Lottery sells PowerBall[®] tickets, collects all revenues, and remits prize funds to MUSL net of low-tier prize awards. Jackpot prizes are payable in either a lump-sum cash distribution or annual installments. Annual installments are satisfied through investments purchased by MUSL. MUSL purchases U.S. government obligations, which are held in irrevocable trusts established by MUSL for the benefit of participating state lotteries. Accordingly, the Lottery does not record an obligation for jackpot awards which are payable in installments from funds provided by MUSL.

The prize pool for PowerBall[®] is 50% of each drawing period's ticket sales. MUSL has placed 2% of each drawing period's ticket sales for PowerBall[®], included as part of each member's prize liability, in prize reserve funds. The maximum balance on the prize reserve funds for PowerBall[®] is \$100.0 million. Once the prize reserve funds exceed this designated cap, the excess becomes part of the prize pool. The prize reserve funds serve as a contingency reserve to protect MUSL from unforeseen prize liabilities, and these reserve funds are to be used at the discretion of the MUSL Board of Directors. The prize reserve funds are refundable to MUSL members if the MUSL disbands or if a member leaves MUSL. Members leaving MUSL must wait one year before receiving their remaining share, if any, of prize reserve funds. At June 30, 2011, the prize reserve funds for the PowerBall[®] game reported a balance of \$97.4 million of which the Lottery's share was \$1.5 million. The Lottery has charged amounts placed into the prize reserve funds to prize awards expense as the related sales have occurred.

All investment earnings relating to the prize reserve funds are credited to an unreserved account for each member state. This account can be utilized to offset operating costs or for the promotion of any MUSL game as approved by the MUSL Board of Directors. During fiscal year 2011, MUSL reduced the Lottery's unreserved account by \$63,700 for a pro rata share of annual operating expenses. The Lottery has recorded all income and operating expenses related to its unreserved account and has reported the balance of \$51,333 at June 30, 2011 on the Statement of Net Assets in "Deposits with MUSL".

(b) *Mega Millions*[®]

MUSL participates as a member (or party) lottery of the Mega Millions[®] Product Group (a group of lotteries participating under an agreement between the Mega Millions[®] lotteries and MUSL to offer the Mega Millions[®] game within their State jurisdictions). The Rhode Island Lottery participates as a member of MUSL, in the sale of tickets, payment of prizes, and associated activities related to the Mega Millions[®] lottery game. As such, the Lottery sells Mega Millions[®] tickets, collects all revenues, and remits prize funds to MUSL net of low-tier prizes. Jackpot prizes are payable either in a lump-sum cash distribution or annual installments. Annual installments are satisfied through investments purchased by MUSL. MUSL purchases U.S. government obligations, which are held in irrevocable trusts established by MUSL for the benefit of participating lotteries. Accordingly, the Lottery does not record an obligation for jackpot awards which are payable in installments from funds provided by MUSL.

RHODE ISLAND LOTTERY

Notes to Financial Statements

(1) Organization - (Continued)

The prize pool for Mega Millions® is up to 55% of each drawing period's sales after prize reserve accounts are funded, but may be higher or lower based on the number of winners at each prize level, as well as funding required to meet a guaranteed annuity grand prize. An amount of up to 5% of a participating lottery's sales is included in trust in one or more prize reserve accounts held by MUSL for its participating members. Contributions to prize reserve accounts are made only when the reserve balances are below the maximum balances designated by MUSL. The maximum deduction to be taken from the grand prize pool to fund the prize reserve account is 2.5%. As of the July 1, 2011 drawing, the deduction taken from the grand prize pool to fund the reserve account is 1.5%. The MUSL Board of Directors, with the approval of the Finance and Audit Committee, is responsible for establishing the maximum prize reserve amount. The Mega Millions® reserve may be adjusted with refunds to a participating lottery as needed to maintain the approved maximum balance and shares to the participating lottery. Any amount remaining in a prize reserve account at the end of this game shall be carried forward to a replacement prize reserve account or expended in a manner as directed by the product group in accordance with the jurisdiction law. At June 30, 2011, the prize reserve fund for the Mega Millions® game reported a balance of \$9.1 million of which the Lottery's share was \$142,499. The Lottery has charged amounts placed into the prize reserve funds to prize awards expense as the related sales have occurred.

MUSL issues a publicly available annual financial report that may be obtained by writing to the Multi-State Lottery Association, 4400 NW Urbandale Drive, Urbandale, Iowa 50322.

(c) *Video Lottery*

Chapter 42-61.2 of the General Laws authorizes the Division of Lotteries to conduct and control video lottery games. This chapter stipulates the allocation of video lottery net terminal income (video lottery credits purchased less credits redeemed or redeemable). Consistent with the General Laws, net terminal income is distributed to licensed video lottery facility operators, the technology providers (video lottery terminal providers), the central communications system provider, the city or town in which the video facility is licensed and the Narragansett Indian Tribe. All residual net terminal income after mandated commission payments, other transfers, and reimbursable marketing expenses is remitted to the State's General Fund.

(2) Summary of Significant Accounting Policies

(a) *Basis of Accounting*

The financial records of the Lottery, an enterprise fund, are accounted for using the economic resources measurement focus and are maintained on the accrual basis of accounting. Under the accrual basis of accounting, revenues are recognized when earned and expenses are recognized at the time the related liabilities are incurred. The Governmental Accounting Standards Board (GASB) has the responsibility for establishing generally accepted accounting principles for governmental proprietary fund type activities.

RHODE ISLAND LOTTERY

Notes to Financial Statements

(2) Summary of Significant Accounting Policies – (Continued)

In accordance with GASB Statement No. 20, in the absence of specific guidance from a GASB pronouncement, pronouncements of the Financial Accounting Standards Board (FASB) issued on or before November 30, 1989 have been followed.

The Lottery has considered the impact and requirements of newly issued GASB Statements in the preparation of these financial statements.

(b) *Reporting Entity*

The Lottery, a division of the Department of Revenue of the State of Rhode Island and Providence Plantations (State), is accounted for as an enterprise fund for financial reporting purposes. Accordingly, its annual financial statements are included in the State's Comprehensive Annual Financial Report (CAFR). The accompanying financial statements are not intended to present the financial position and results of operations of the State.

(c) *Revenues and Expenses*

The Lottery defines all revenues and expenses deriving from on-line, instant ticket and video lottery sales as operating. All other revenues and expenses are defined as non-operating. The Lottery accrues for the maximum prizes payable. Prize obligations, other than those relating to prizes payable in installments, that remain unclaimed one year after the drawing date are reported as a reduction to cost of sales

Revenue from the sale of lottery tickets and video lottery, and expenses for prizes and commissions are recognized as follows:

1. On-line lottery games with specific drawing dates - when the related drawings are held.
2. Instant ticket lottery games - when ticket packets are charged to retailers. Prize expense is recognized in proportion to the number of tickets sold based on the stated prize structure for a specific instant ticket game.
3. Video lottery games - gross revenue is recognized when game credits are purchased via cash or credit redemption at the terminal (gross terminal inputs). Related prizes are recognized when game credits are issued by a video lottery terminal making them redeemable as credits in another video terminal or for cash by a patron (gross terminal outputs). Beginning in fiscal year 2011, video lottery revenue is reported in the Statement of Revenue, Expenses, and Changes in Net Assets as the net of gross terminal inputs and outputs resulting from video lottery operations.

RHODE ISLAND LOTTERY

Notes to Financial Statements

(2) Summary of Significant Accounting Policies – (Continued)

The gross video lottery terminal inputs and outputs for fiscal 2011 and reported video lottery net revenue are detailed in the following schedule:

Schedule of Video Lottery Net Revenue For the Fiscal Year Ended June 30, 2011	
Video Terminal Cash-In (Gross Terminal Inputs):	
Cash collected from video lottery terminals	\$ 1,398,834,202
Plus: Credit vouchers redeemed for play in video lottery terminals	<u>1,496,174,176</u>
Total cash in reported by video lottery terminals	2,895,008,378
Less:	
Video Terminal Cash-out (Gross Terminal Outputs):	
Video lottery credit vouchers issued by video lottery terminals	2,401,387,066
Plus: Contributions to progressive video jackpots from patron play	<u>1,027,123</u>
Total cash-out amounts reported by video lottery terminals	<u>2,402,414,189</u>
Video lottery revenue, net	<u><u>\$ 492,594,189</u></u>

(d) *Capital Assets*

Capital assets are stated at historical cost. Depreciation is computed using the straight-line method based on the estimated useful lives of the assets. The Lottery's capitalization threshold is \$5,000.

(e) *Cash Equivalents*

Cash equivalents consist of highly liquid investments with a maturity of three months or less at the time of purchase and are stated at cost plus accrued interest which approximates fair value.

(f) *Ticket Inventory*

Inventory consists of the cost of tickets for the instant games, which is expensed as a percentage of sales from instant ticket games.

(g) *Deferred Revenue*

Tickets can be purchased in advance of scheduled drawing dates. Revenue from advance ticket sales is recognized during the period in which the related drawing is held. Sales pertaining to future drawings are reported as deferred revenue.

RHODE ISLAND LOTTERY

Notes to Financial Statements

(2) Summary of Significant Accounting Policies – (Continued)

(h) *Unearned Contract Revenue*

Unearned contract revenue relates to the sale of the exclusive rights to the operation of the Lottery's gaming systems. The revenue is recognized ratably over the life of the contract.

(i) *Incentive Programs – Video*

Beginning in fiscal 2011, the Lottery began reimbursing its contracted video lottery facilities for the State's share (net terminal income percentage) of certain marketing and promotional expenses incurred by the facilities. Complete details of the Lottery's reimbursement are disclosed in Note 12, Commitments.

(j) *Use of Estimates*

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual amounts could differ from those amounts.

(k) *Change in Presentation*

For fiscal 2011 net video lottery terminal revenue is included in the financial statements as compared to gross video lottery revenue and prize awards reported in prior periods. Prior period amounts included in Management's Discussion and Analysis have been restated to conform to the new net presentation.

Beginning in fiscal 2011, advertising expenses for on-line and instant ticket games is reported as a direct cost of gaming operations. The Lottery previously reported its advertising as an operating expense not specifically attributable to any one gaming category. Schedule 1, provided as supplementary information, details advertising expense by lottery game.

(3) Deposits and Investment Risk

(a) *Deposits*

The Lottery's cash deposit balances at June 30, 2011 totaled \$790,468, with corresponding bank balances totaling \$804,120. The bank balances consisted of \$259,676 in demand deposit accounts and \$544,444 in collateralized deposit investment accounts.

All deposits were in the custody of the State General Treasurer. Deposits are exposed to custodial credit risk if they are not covered by depository insurance and the deposits are (a) uncollateralized, (b) collateralized with securities held by the pledging financial institution, or (c) collateralized with securities held by the pledging financial institution's trust department or agent but not in the Lottery's (or State's) name.

RHODE ISLAND LOTTERY

Notes to Financial Statements

(3) Deposits and Investment Risk - Continued

In accordance with Chapter 35-10.1 of the General Laws, depository institutions holding deposits of the State, its agencies or governmental subdivisions of the State, shall at a minimum, insure or pledge eligible collateral equal to one hundred percent of time deposits with maturities greater than 60 days. Any of these institutions which do not meet capital standards prescribed by federal regulators shall insure or pledge eligible collateral equal to 100% of deposits, regardless of maturity. None of the cash deposits of the Lottery were required to be collateralized at June 30, 2011 pursuant to Chapter 35-10.1 of the General Laws. However, the State Investment Commission has adopted a collateralization requirement for institutions holding the State's deposits. Financial institutions are required to pledge collateral equal to 102% of the uninsured deposit amounts. Of the total bank deposit balance totaling \$804,120 at year end, the entire amount was either covered by federal depository insurance or collateralized by securities held by an independent third party custodian.

(b) *Investments*

All investments, principally cash equivalent type investments, are made by the State General Treasurer in accordance with guidelines established by the State Investment Commission (SIC), which is responsible for the investment of all State funds. Pursuant to Chapter 35-10 of the General Laws, the SIC may, in general, "invest in securities as would be acquired by prudent persons of discretion and intelligence in these matters who are seeking a reasonable income and the preservation of their capital."

At June 30, 2011, the Lottery's investment balance consisted of a money market mutual fund as follows:

Investment Description	Fair Value at June 30, 2011	Credit Rating	Average Maturity
BlackRock Liquidity Funds – FedFund Institutional Shares	\$ 17,438,245	AAAm (S&P) Aaa- mf (Moody's)	31 days

Custodial Credit Risk: Investment securities are exposed to custodial risk if the securities are uninsured, are not registered in the name of the government and are held by either: a) the counterparty or b) the counterparty's trust department or agent but not in the government's name. Pursuant to guidelines established by the SIC, securities purchased, or underlying collateral, are required to be delivered to an independent third party custodian.

Interest Rate Risk: Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. Based on SIC policy, the State's short-term investment portfolio, whenever possible, will be structured to minimize interest rate risk, by matching the maturities of investments with the requirements for funds disbursement. The Lottery's investments are typically money market mutual funds or investments with maturities less than 30 days thereby minimizing the Lottery's exposure to interest rate risk.

RHODE ISLAND LOTTERY

Notes to Financial Statements

(3) Deposits and Investment Risk - Continued

Credit Risk: Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The SIC has adopted policies regarding acceptable short-term investment types. Credit risk is mitigated by the SIC's minimum rating criteria policy, collateralization requirements, and limiting the maximum participation by any one issuer to 35% of the State's total short-term investment portfolio. Credit risk policies have been developed for investments in commercial paper.

Concentration of Credit Risk: The SIC has adopted limitations as to the maximum percentages of the State's total short-term investment portfolio that may be invested in a specific investment type or with any one issuer of securities.

(c) Cash and Cash Equivalents

Cash and cash equivalents on the Statement of Net Assets consist of the following:

Cash deposit balance per books	\$ 790,468
Investments classified as cash equivalents	<u>17,438,245</u>
Cash and cash equivalents	<u>\$ 18,228,713</u>

(4) Capital Assets

Lottery headquarters are situated on land owned by the State of Rhode Island. The State has assigned custody, control and supervision of the land to the Lottery at no cost. However, since title to such land remains vested in the State, it is not recorded in the statement of net assets.

RHODE ISLAND LOTTERY

Notes to Financial Statements

(4) Capital Assets - Continued

A summary of capital assets follows:

<u>Cost</u>	<u>Estimated Useful Life</u>	<u>Balance at July 1, 2010</u>	<u>2011 Additions</u>	<u>2011 Disposals</u>	<u>Balance at June 30, 2011</u>

Capital assets, net		<u>\$ 690,870</u>	<u>\$ (220,851)</u>	<u>\$ (523)</u>	<u>\$ 469,496</u>

(5) Transfers to the State

The Lottery is required to transfer net proceeds from the Lottery's games in accordance with RI General Laws sections 42-61-15 and 42-61.2-7 as follows:

- (a) Transfers to the State's General Fund for fiscal 2011 are reported as follows in the Lottery's financial statements:

Due to State's General Fund, beginning of year	\$ 1,646,003
Transfers to State's General Fund	354,860,987
Cash paid during fiscal year	<u>(353,775,229)</u>
Due to State's General Fund, end of year	<u>\$ 2,731,761</u>

RHODE ISLAND LOTTERY

Notes to Financial Statements

(6) Commissions

The Lottery pays commissions to ticket retailers and its on-line games contractor based on a percentage of gross ticket sales. Video lottery commissions, as specified in the General Laws, are paid to the facility operators, technology providers (video lottery terminal providers), the central communications provider and others based on various percentages of net terminal income (video lottery credits purchased less credits redeemed or redeemable plus progressive jackpots).

The General Laws provide for reductions of certain video lottery commissions. The amount reduced is to be credited to the State's Distressed Communities Relief Fund, which is part of the State's General Fund. The Lottery has reflected the actual video commissions paid as an expense. The amount to be credited to the Distressed Communities Relief Fund is included in the payments to the State's General Fund.

(7) Compensated Absences

The Lottery accrues an estimated liability for vested benefits relating to future compensated absences. This includes an expected obligation in connection with vacation credits, pay reduction credits, and accumulated vested sick pay for those employees eligible for retirement. The liability for compensated absences was approximately \$434,154 and \$361,826 as of June 30, 2011 and 2010, respectively, and is recorded as a liability in the Statement of Net Assets. The current portion of \$187,195 as reported was estimated based on a two year average of employee utilization experience.

Changes in the reported liability for compensated absences for fiscal 2011 are as follows:

	Balance at July 1, 2010	Increase	Decrease	Balance at June 30, 2011
Liability for Compensated Absences	\$ 361,826	\$ 347,240	\$ 274,912	\$ 434,154

(8) Net Assets - (Deficiency)

On May 12, 2003, the Lottery entered into a 20-year contract, effective July 1, 2003, with its current gaming system provider. The contract granted the provider the right to be the Lottery's exclusive vendor of hardware and software, together with the related services necessary for the operation of the Lottery's computerized games, through June 30, 2023. In return, the provider made a one-time payment of \$12.5 million to the Lottery as consideration for this exclusive contract right. The Lottery recorded unearned contract revenue in the amount of \$12.5 million and transferred the cash to the State's General Fund on June 30, 2003. This prior year transfer of unearned contract revenue resulted in a deficiency in net assets at June 30, 2011 of \$7.5 million. As the contract revenue is recognized over the twenty-year life of the contract, the deficiency in net assets will be reduced by \$625,000 per year. Accordingly, the Lottery has recognized \$625,000 as the current portion of unearned revenue as of June 30, 2011.

Net assets reported by the Lottery also include its investment in capital assets, net of accumulated depreciation. The Lottery had no debt related to capital assets at June 30, 2011.

RHODE ISLAND LOTTERY

Notes to Financial Statements

(9) Retirement Plan

Plan Description:

All Lottery employees must participate in a cost-sharing multiple-employer defined benefit pension plan administered by the State of Rhode Island Employees' Retirement System (ERS). The plan provides retirement and disability benefits, annual cost-of-living adjustments, and death benefits to plan members and beneficiaries. The level of benefits provided to state employees is established by Chapter 36-10 of the General Laws, which is subject to amendment by the General Assembly. The ERS issues a publicly available financial report that includes financial statements and required supplementary information for plans administered by the system. The report may be obtained by writing to the Employees' Retirement System, 40 Fountain Street, Providence, RI 02903.

Funding Policy:

The funding policy, as set forth in the General Laws, Section 36-10-2, provides for actuarially determined periodic contributions to the plan. Lottery employees are required to contribute 8.75% of their annual covered salary. The Lottery is required to contribute at an actuarially determined rate; the rate was 20.78% of annual covered payroll for the fiscal year ended June 30, 2011. The Lottery contributed \$595,558, \$582,513 and \$586,324 for the fiscal years ended June 30, 2011, 2010 and 2009, respectively, equal to 100% of the required contributions for each year.

(10) Postemployment Healthcare Plan

Plan Description:

The Lottery contributes to the State Employees' defined benefit post-employment health care plan, a cost sharing multiple employer plan administered through the Rhode Island State Employees' and Electing Teachers OPEB System (OPEB System). The State of Rhode Island OPEB Board (Board) was authorized, created and established under Chapter 36-12.1 of the RI General Laws. The Board was established to independently hold and administer, in trust, the funds of the OPEB system. The plan provides medical benefits to certain retired employees of participating employers including the Lottery.

Pursuant to legislation enacted by the General Assembly, a trust was established in fiscal year 2011 to accumulate assets and pay benefits and other costs associated with the system.

Beginning with the fiscal year ended June 30, 2011, the OPEB system will issue a stand-alone financial report. A copy will be available at the web site of the Office of Accounts & Control – <http://controller.admin.ri.gov/Financial%20Reports/index.php>.

Funding Policy:

RIGL Sections 36-12.1, 36-12.2.2, and 36-12-4 govern the provisions of the OPEB system. The contribution requirements of plan members, the State, and other participating employers are established and may be amended by the General Assembly. Active employees make no contribution to the OPEB plan. Employees who retired after October 1, 2008 must contribute 20% of the annual estimated benefit cost (working rate) or annual premium for Medicare supplemental coverage. Employees retiring before October 1, 2008 have varying co-pay percentages ranging from 0% to 50%

RHODE ISLAND LOTTERY

Notes to Financial Statements

(10) Postemployment Healthcare Plan - Continued

based on age and years of service at retirement. Further information about the contributions of plan members can be found in the financial report of the OPEB system.

Effective in fiscal year 2011, all participating employers are required by law to fund the actuarially determined annual required contribution (ARC), which for fiscal year 2011 was 6.74% of covered payroll. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal costs each year and amortize any unfunded actuarial liabilities (or funding excess) over a period not to exceed thirty years. The Lottery's contribution to the plan for the year ended June 30, 2011 was \$193,447. Prior to the creation of the OPEB trust in fiscal year 2011, the contributions to the plan were made on a pay as you go basis.

In prior years, the Lottery contributed to the State Employees' OPEB plan, which consistent with GASB 45 provisions, was administered as an agent multiple employer plan because no separate legal trust had been created. The transition by the State of its OPEB plan in fiscal 2011 to an OPEB Trust resulted in the State Employees' Plan being redefined as a cost sharing multiple employer plan. In accordance with the requirements of GASB 45, the Lottery's net OPEB obligation recorded in previous years has been reduced to zero.

(11) Deferred Compensation

Employees of the Lottery may participate in a deferred compensation plan offered by the State. Required disclosures are reported in the State's CAFR.

(12) Commitments

(a) Gaming Systems Provider – GTECH (an indirect wholly-owned subsidiary of Lottomatica Group S.p.A.)

During May 2003, the Lottery entered into a 20-year master contract with its gaming systems provider granting them the right to be the exclusive provider of information technology hardware, software, and related services for all lottery games. This contract is effective from July 1, 2003 through June 30, 2023, and amends all previous agreements between the parties.

As consideration for this exclusive right, the gaming systems provider paid the Lottery \$12.5 million. In the event that the contract term is not fulfilled, the Lottery will be obligated to refund a pro-rata share of this amount to the gaming systems provider. Additionally, GTECH was obligated to invest \$100 million in connection with the construction of a new corporate headquarters and expansion of its manufacturing operations in the State. The gaming system contractor is also required to employ no less than 1,000 full time active employees during the term of the agreement.

RHODE ISLAND LOTTERY

Notes to Financial Statements

(12) Commitments - Continued

The contract mandates commission percentages as detailed in the following chart.

Commission Percentages	
On-Line and Instant Tickets	
Total Lottery Sales in the Year	Percent Thereof
\$0 - \$275 Million	5.00%
Over \$275 Million - \$400 Million	1.00%
Over \$400 Million	5.00%
Video Lottery Central System	
Total Net Terminal Income for the Year	Percent Thereof
\$0 - \$500 Million	2.50%
Over \$500 Million - \$1 Billion	1.00%
Over \$1 Billion	2.50%

The Lottery also leases to the vendor a portion of its headquarters to house the computer hardware and office space necessary for the operation of the Lottery's games. The term of the lease is five (5) years, commencing October 19, 2007 and the square footage leased is 5,101 square feet. The annual lease amount for the first year approximated \$87,000 and the four (4) remaining years will increase by four percent (4%) per annum, effective October 19. The tenant has two (2) renewal options; an additional five (5) year term and an additional four (4) year term. The base rate for the renewal options will be an increase of four percent (4%) per annum unless a mutually acceptable rate is negotiated.

(b) Video Lottery Facility Operator – UTGR, Inc. (Twin River)

On July 18, 2005, the Lottery entered into a five (5) year Master Video Lottery Terminal Contract with UTGR, Inc. (UTGR), the owners of Twin River, to manage one of the State's licensed video lottery facilities. The contract entitles UTGR to compensation ranging from 26% to 28.85% of video lottery net terminal income at the facility. UTGR and the lottery extended the contract and signed the first five-year extension term commencing on July 18, 2010. The second term would commence on July 18, 2015. Certain extensions are contingent on UTGR's compliance with full-time employment mandates.

The First Amendment to the Master Contract provides for a promotional points program of up to 4% of the facility's prior year net terminal income. The general laws require a base of \$750,000 to be expended before the previously authorized 4% of prior year net terminal income. The First Amendment requires the Lottery to reimburse UTGR for allowable marketing expenses at an amount not to exceed \$6 million multiplied by the Lottery's percentage of net terminal income (61.08% for fiscal 2011). The reimbursement of marketing expenses by the Lottery occurs only after UTGR has incurred \$4 million in qualified marketing expenses (with marketing expenses defined by the Lottery) and is contingent on the State receiving net terminal income from UTGR at least equal to fiscal year 2009 amounts. These amounts were pro-rated on a partial year basis for fiscal year 2011.

RHODE ISLAND LOTTERY

Notes to Financial Statements

(12) Commitments - Continued

(c) Video Lottery Facility Operator – Newport Grand Jai Alai, LLC (Newport Grand)

On November 23, 2005, the Lottery entered into a five (5) year Master Video Lottery Terminal Contract with Newport Grand to continue to manage one of the State's licensed video lottery facilities.

Newport Grand and the Lottery extended the contract and signed the first five-year extension term of the contract commencing on November 23, 2010. The second term, which would commence on November 23, 2015, is contingent on Newport Grand's compliance with full-time employment mandates specified in the 2010 law.

The First Amendment also provides for a promotional points program of up to 4% of the facility's prior year net terminal income and requires the Lottery to reimburse Newport Grand for allowable marketing expenses at an amount not to exceed \$840,000 multiplied by the Lottery's percentage of net terminal income (61.69% for fiscal 2011). The reimbursement of marketing expenses by the State occurs only after Newport Grand has incurred \$560,000 in qualified marketing expenses (with marketing expenses to be defined by the Lottery). These amounts are pro-rated on a partial year basis for fiscal year 2011. Additionally, the First Amendment provides an allocation of video lottery net terminal income to Newport Grand equal in percentage to that of UTGR.

(13) Contingencies

- (a) The Lottery's master contracts with its video lottery facilities contain revenue protection provisions in the event that existing video lottery facilities incur revenue losses caused by new gaming ventures within the State.
- (b) A significant portion of the Lottery's revenues are derived from video lottery conducted at two licensed video lottery facilities. As more fully described below, each of these facilities has experienced financial difficulties.

In March 2008, the owner and manager of the Twin River video lottery facility (debtors) defaulted on a loan payment to its lenders. On June 23, 2009, the debtors commenced a Chapter 11 bankruptcy filing for relief in the United States Bankruptcy Court for the District of Rhode Island (Court). A consensual reorganization plan was approved by the Court, with the lenders becoming the new owners of the facility.

In October 2010, the Director of the Department of Business Regulation approved an application for a change in ownership and management structure of the facility. Thereafter, on November 5, 2010, the Division of State Lottery, Department of Revenue issued a video lottery license to the new owners. A motion was filed in May 2011 by the reorganized debtors seeking a final decree closing the Chapter 11 bankruptcy. The federal bankruptcy judge withheld entry of the final decree pending receipt of additional information relative to certain representations of the facility regarding the impact of the potential allowance of table and casino-style gaming at Twin River. The debtors filed additional information with the Court on or before July 31, 2011. On September 29, 2011, the Court issued a Decision and Order approving the debtors' Motion for Entry of Final Judgment and the Final Application for Fees and Expenses.

RHODE ISLAND LOTTERY

Notes to Financial Statements

(13) Contingencies - Continued

In 2008, Newport Grand entered into a \$25,000,000 financing agreement with two banks for expansion and renovation of its video lottery terminal facility. Prior events of default relative to failing to meet earnings levels amended the loan agreement which required additional partner contributions, quarterly deposits and restricted dividend distributions. During fiscal 2011, further events of default were triggered for failing to meet minimum loan to value ratio requirements. Subsequent loan amendments required continued deposits and new loan covenant requirements.

The Department of Revenue, Division of State Lottery, and the Department of Business Regulation continue to closely monitor these facilities; however, the Lottery does not anticipate any material impact to video lottery operations or the revenue derived thereof.

- (c) The Lottery's video lottery operations could be adversely impacted by legislative efforts in Massachusetts to allow three casinos and one slot parlor in that State. If successful, and depending on the resulting location of the facilities within Massachusetts, video lottery revenues in Rhode Island could decrease.

The Rhode Island General Assembly enacted legislation that calls for analysis of competitive casino gaming operations and a statewide referendum (November 2012) to allow casino style gaming at Twin River. Subsequently, the constitutionality of that legislation is being challenged by the Narragansett Indian Tribe. The State does not believe that the Tribe's law suit seeking a declaratory judgment will be successful.

- (d) The Lottery has recorded a receivable of \$638,931 at June 30, 2011 from Twin River for promotional points awarded and redeemed by the video lottery facility during fiscal 2011 in excess of 4% of the facility's prior year net terminal income. Twin River is currently disputing the amount owed to the State at June 30, 2011. Lottery management believes this amount is supported by the terms of the promotional points program. The Lottery has also recorded a liability of \$69,937 at year-end for the related commissions due to other video lottery participants (i.e., technology providers, central communications provider, Town of Lincoln, etc.) for the impact on net terminal income.

(14) Risk Management

The Lottery is exposed to various types of risk related to its operations. These risks can result in losses incurred from property damage or destruction, inability to operate gaming activities and worker compensation claims. The Lottery manages these risks through the purchase of commercial insurance. During fiscal 2011, the Lottery maintained its amount of purchased insurance coverage. Claims and settlements incurred for fiscal years 2011, 2010 and 2009 have not exceeded the Lottery's insurance coverage.

The Lottery participates in the health insurance program for all State employees.
